Dear Project Supporter:

It is my honor to serve with Tom Cruise on the Host Committee for this special event.

The New York City Detective Investigators' Association is proud to be the first law enforcement union to endorse the work of the New York Rescue Workers Detoxification Project. More than 100 police officers have completed the program, including thirteen of my detectives who are now back to full duty.

The needs of our members who are ill as a result of their service at the World Trade Center are simple. They want to be able to breathe comfortably. They want the quality of life they enjoyed before their exposure, and the well being necessary to do their job and enjoy their families.

The services that the New York Rescue Workers Detoxification Project provides are what all rescue workers deserve – a safe, effective way to regain control of their lives. In case after case, the Hubbard detoxification program has achieved this result.

It is unthinkable that these brave men and women continue to suffer more than five years after the attacks when a remedy is available. You have kept this noble program going, and changed lives as a result. On behalf of my officers, I thank you. We will work with you to bring more funding, so more lives can be saved.

Yours sincerely,

John M. Fleming  
President
